ALUMINIUM COMPOSITE PANELS

1<sup>st</sup>  
**FR**  
COMPANY IN INDIA

We Are  
**Royal, Classic & Primo**

Version 3.2

**HYNADecor** is one of the leading manufacturers of Aluminium composite panels (ACP) in India. HYNADecor, an ISO 9001:2015, ISO 14001:2015 & OHSAS 18001:2007 certified company was set up since 2013 in New Delhi. We are manufacturing aluminium composite panels (ACP) under the brand name of "HYNADecor". Our manufacturing facilities are located at Sonipat in Haryana and it's spreading in an area of 8093 SqMtr. We have a fully automatic high tech FR grade ACP manufacturing compatible machine and has an integrated infrastructure as well as a talented pool of professionals operate it. The production capacity is approx. 1, 44, 000, 00 Square fts per annum. The plant is equipped with all safety measures and generator to ensure uninterrupted production. We have in house all raw materials facilities as well as quality check labs to maintain highest international standards and where quality endurance tests are conducted as per ASTM Standards.

We have India's first a fully automatic high tech fire retardant ACP manufacturing compatible machine and it's specialize in manufacturing fire retardant aluminium composite material with international standards. We tend to implement best practices and also invent new practices as to stay above the rest in the manufacturing sectors. The main parameters which determine HYNADecor FR are quality, cost effective, flexibility and innovation. It's used to be very difficult to extrude mineral-filled core, but our advanced technology has enabled us to produce HYNADecor (FR) as efficient as ordinary core materials. It is green material, as there is no harmful burning.

**HYNADecor FR** grade meet the highest requirements of the fire regulations and is therefore the ideal material for all areas where fire protection plays an important role—be it for high-rise or industrial buildings, public buildings, hospitals, hotels, tunnels or underground stations. Furthermore, with its proven product and processing properties, HYNADecor FR grade aluminium composite panels offer architects designers' unlimited opportunities for realizing their ideas.

**We are also committed to innovation in designing building products....**

#### **ADVANTAGES**

- 100 % maintenance free.
- Saves construction time and cost at the last stages of Construction.
- Provides sound insulation and resistant to weathering effects.
- Resistant to breakage.
- Exemplary versatility in fabrication.
- Excellent UV characteristics.
- Hi-tech appeal.
- Long lasting.
- Easily available as indigenously manufactured.
- Excellent uniformity.
- Superior flatness.

[www.hynadecor.com](http://www.hynadecor.com)

**Hynadecor (FR)** is an Aluminium Composite Material (ACM) for exterior cladding. It's composed of core material and aluminium skins. The core material contains a non-combustible mineral and small content of thermoplastic, which ensures high performance of fire safety of this material. The skin is 0.5mm thick aluminium of 3005 H-16. The surface is finished with high-performance PVDF/Lumiflon-based paint and the back is a service coating. We use high-performance PVDF/Lumiflon-based fluorocarbon paint for the surface coating, ensuring both high durability and consistent coating quality. PVDF/Lumiflon-based fluorocarbon coating has a coating warranty of 12 years.

The greatest concern in external cladding is upward flaming over a vertical exterior wall, particularly in high-rise buildings. Various types of fire tests are required to examine the fire performance and non-combustibility of building materials. HYNADecor (FR) not only passes all tests, but it is also certified to meet NBC for external cladding without any height restrictions.

**GENERAL SPECIFICATION**

DIMENSIONS	MEASUREMENT	
Thickness	3mm, 4mm, 5mm, 6mm (±0.2mm)	
Width	1200mm (±2mm)	
Length	Less than 6000mm (±4mm)	
Bow	Max 0.5% of any dimensions	
Diagonal Lines Difference	Max 5mm	

  

MECHANICAL PROPERTIES	STANDARD	MEASUREMENT
Tensile Strength	ASTM D-638	49MPa
Yield Strength	ASTM D-638	44MPa
Bending Strength	ASTM C-393	120MPa(4mm)
Flexural Elasticity	ASTM C-393	2.6X104(4mm)
Shearing Strength	ASTM D-732	33MPa
Penetrating Resistance	ASTM D-732	11 kN
Adhesive Peel off Strength	ASTM D-903	10N/MM
Wind Pressure resistance	ASTM E-330	Passed
Resistance against water	ASTM E-331	Passed
Resistance against air	ASTM E-283	Passed

**FIRE RESISTANT ACP**

GRADE	STANDARD
Class - A2	EN13501 -1, s1, d0 ASTM - E119
Class - B	EN13501-1, s1, d0 ASTM -E119
Class - B1	DIN4102
Class - 0	BS476

# HYNADECOR A2 FIRE RETARDANT ACP

## FIREPROOF ALUMINIUM COMPOSITE PANEL

**HYNADECOR A2** fireproof metal composite panels are FIRE RETARDANT product as per En135501-1,s1,do & ASTM - E119. It is covered on both sides with PVDF coated aluminium sheets, and embedded in between with natural inorganic materials. **The inorganic material content is >-90% off the core**, with balance made of virgin LDPE.

The metal sheet and core are perfectly bound by a special macromolecule binder. **The advance process technology of HYNADECOR produce the perfect FIRE RETARDANT CORE also** improves the panels mechanical feature as Highest grade of FIRE RESISTANCE ACP, toughness, impact resistance and crushing resistance, which therefore ensure. That the ACP resists fire for minimum 2 hours with No MOLTEN DROPLETS & NEGLIGIBLE SMOKE.

## FIRE RESISTENCE CHARACTERISTICS

The material classifies to **“Reaction to Fire”** is Compliance with **EN13501-1:2007+A1:2009** Classified as **A2-s1,d0**. Available in The thickness of 3.00 mm to 6.00 mm with overall weight of 8.50 kg/mt<sup>2</sup> (for 4.00 mm ACP with coil of 0.50 mm on either side)

## PRODUCt SPECIFICATION - ACP

\*Colour may vary from batch to batch  $\Delta \pm 5$

To avoid colour variation, place an order the total quantity for one particular building.  
To avoid possible reflection of light variation, install panels in the same direction as marked on the protective film.

\*Incase of any manufacturing fault, the liability will be limited only to the Product.
